

RCET Lab Video Extra Credit

Show people what you are actually doing in lab. Record, post, tag, and get back to work.

Earn +1% on this week's lab grade for each qualifying social-media post, up to +5% total.

You can use **one video on five platforms, five different videos on one platform, or any combination in between.** The same exact video posted more than once on the same platform counts only once.

What to do

1. Record a short video while you are already working in RCET lab.
2. Briefly say what you are working on or what the equipment/program/circuit is doing.
3. Upload it. **No editing, music, graphics, or special effects are required.**
4. Add the appropriate mentions and the standard hashtags below.

Examples: "We're programming a PIC microcontroller and trying to get this display working." "We're using the oscilloscope to troubleshoot this circuit."

Standard hashtags

#idahostateu #idahostatetech #robotics

You may add a topic-specific hashtag if it fits, such as #electronics, #programming, #microcontrollers, #embeddedsystems, or #cybersecurity.

Who to mention or tag

Instagram	@isu_robotics @isucollegeoftechnology @idahostateu #idahostateu #idahostatetech #robotics
Facebook	Tag <i>Idaho State University Robotics Program</i> , <i>Idaho State University College of Technology</i> , and <i>Idaho State University</i> . Hashtags: #idahostateu #idahostatetech #robotics
X	Tag <i>ISU College Of Technology</i> and <i>Idaho State University</i> . Hashtags: #idahostateu #idahostatetech #robotics
YouTube	Tag/mention <i>Idaho State University College of Technology</i> and <i>Idaho State University</i> . Hashtags: #idahostateu #idahostatetech #robotics
Other	Hashtags, when supported: #idahostateu #idahostatetech #robotics. No additional institutional account is listed unless verified by the instructor.

Good platforms: Instagram, Facebook, X, YouTube Shorts, or another instructor-approved platform you already use. You do **not** need to create a new social-media account.

What do @mentions and #hashtags do?

@mention/tag: points to a specific account or page. It helps RCET, the College of Technology, or ISU find your post and potentially share it.

#hashtag: labels the topic. People can click or search a hashtag to find related public posts.

Prefer not to use social media? If you have difficulty using social media or prefer not to use it, meet with your instructor. You can discuss another way to earn equivalent extra credit.
